## PROFESSIONAL SUMMARY

A growth-oriented and result-focused Frontend Software Engineer with 5 years of experience building enterprise-scale e-commerce platforms using Vue.js, TypeScript and Server-Side Rendering (SSR). Experienced in Vue 2 to Vue 3 modernization, Vite architecture, frontend performance optimization, scalable component systems, REST APIs and CI/CD.

## AREAS OF EXPERTISE

|                                  |                                                                                  |
|----------------------------------|----------------------------------------------------------------------------------|
| <b>Frontend:</b>                 | Vue 2   Vue 3   Nuxt 2   Composition API   TypeScript   JavaScript (ES6+)   Vite |
| <b>Architecture:</b>             | Server-Side Rendering (SSR)   Hydration   Frontend Architecture                  |
| <b>Backend &amp; APIs:</b>       | Node.js   Hono   Bun   REST APIs   Fetch API   Axios                             |
| <b>DevOps:</b>                   | Git   GitHub Actions   CI/CD   YAML   Shell scripting                            |
| <b>AI &amp; LLM &amp; GenAI:</b> | Prompt engineering   Cursor   Claude   Agentic engineering                       |
| <b>Performance &amp; Web:</b>    | SEO   Core Web Vitals   PageSpeed Insights   Performance Optimization            |
| <b>Analytics:</b>                | Google Tag Manager   Google Consent Mode v2                                      |

## PROFESSIONAL EXPERIENCE

### Frontend Developer, BESTSELLER A/S | Brande, DK

February 2021 – July 2026

- Designed and implemented a scalable override system for reusable frontend components and brand-specific customization across 14 international e-commerce websites.
- Optimized image rendering and frontend performance, improving page load speed, Google PageSpeed Insights scores and Core Web Vitals by up to 10 points across multiple brands.
- Contributed to CI/CD by developing Shell scripts for Git automation and maintaining GitHub Actions YAML deployment workflows.
- Contributed to architectural decisions during the migration to a shared monorepo architecture used across 14 international brands.
- Performed 100+ code reviews and contributed to frontend best practices, code quality and maintainability.
- Implemented Server-Side Rendering (SSR) to improve SEO, initial page load performance and user experience.
- Contributed to the migration from Vue 2/Nuxt 2 to a shared Vue 3 Composition API, TypeScript, Vite and SSR architecture supporting 14 international brands.
- Developed customer-facing features by integrating RESTful APIs and collaborating with Product, Design, QA and Backend engineers in an Agile Scrum environment.

### Frontend & Data Support Student, The LEGO Group | Billund, DK

February 2019 – January 2020

- Implemented integration testing using OPA5 within SAP Fiori/UI5.
- Performed data processing using Python with AWS storage solutions.
- Supported the Demand Planning department with testing and automation initiatives.

### Solution Analyst Intern, Everis Spain S.L.U | Barcelona, ES

August 2018 – December 2018

- Developed frontend features using Angular 5 and TypeScript.
- Contributed to backend services using Java Spring Boot, Maven and Hibernate.
- Worked in an Agile development environment delivering client-focused solutions.

## EDUCATION

BS in Information and Communication Technology - Data Engineering specialization, VIA University College, Horsens, DK

## LANGUAGES

Romanian — Native | English — Professional working proficiency | Danish — Conversational proficiency
